### Cost of Borrowing

Interest Explained – based on 39.9% APR for a £1,200 credit limit.

To reduce the amount charged we recommend you pay as much as you can when you can and not just the minimum repayment. See the example below.

#### Illustrative example – For a purchase of £500 on Your credit card

Monthly Payment	Minimum Payment each month	£50 each month
Without taking into account any introductory rates, how much will you be charged in interest and Fees in the first year?	£154.17	£105.01
How much will you be charged in the second year?	£118.19	£0.85
How long would it take to clear the balance?	6 years	1 year, 1 month

The above example assumes the following: The transaction takes place on 1st January and you make no further transactions. Your statement is produced on the 1st of each month and you always make the payment each month on the 15th. Your statement is produced 31 days after you make the purchase.
